

AWE Software and P3 Propane Safety Announce New Integration

FOR IMMEDIATE RELEASE

Automated Wireless Environments (AWE) and P3 Propane Safety are pleased to announce that AWE has successfully integrated with the P3 Compliance System. The integration is available to AWE customers immediately.

The integration sends customer account information from AWE to P3 after the initial data push. Each day, P3 will continue to receive data as new accounts are added to AWE. This creates efficiencies for the mobile application, reduces data entry errors, and helps certify the accuracy of your database.

Clients can take the integration a step further by customizing data points to be passed from P3 to AWE. Safety documentation entered into P3 will collect and then pass these pertinent data points to AWE. This is a great way to see the full picture in one interface.

“We appreciate that P3 Propane Safety integrates with AWE,” said Jeff Spiegel, Vice President of SOS Xtreme Comfort in Tuxedo Park, New York. “The compatibility between the programs provides seamless operation of our back-end systems, which increases our efficiency tremendously.”
