

PDI Technologies Announces Phase 2 of Integration with P3 Propane Safety

FOR IMMEDIATE RELEASE

P3 Propane Safety and PDI Technologies (formerly Blue Cow Software) are pleased to announce that Phase 2 of their integration has been released, which includes new features developed on behalf of mutual customers shared by the two software platforms.

P3 and PDI released a Phase 1 integration in April 2019. The initial release facilitated the secure passing of data from PDI to P3, including PDI customer account numbers, names, and addresses, along with daily gains and losses.

The newest release, Phase 2, links PDI accounts directly to the equivalent accounts within the P3 Compliance System at the click of a button. This functionality allows users to quickly view relevant propane safety documentation, which leads to increased efficiency and greater data accuracy.

Mike Procopio, Project Operations Manager at PDI, said of the integration, "We are pleased to launch Phase 2 of our integration with P3 Propane Safety. We look forward to continuing to support our mutual propane and commercial fueling customers with improved features that make their days and their businesses run more precisely, powerfully, and safely."

Jane Lapsley, integrations director of P3 Propane Safety, stated, "We are grateful to have the opportunity to release Phase 2 of our integration with PDI and are excited to continue working with them on future features."
