

NPGA's Affinity Partnership with P3 Propane Safety and P3 Duty to Warn

FOR IMMEDIATE RELEASE

The National Propane Gas Association (NPGA) is an established Affinity Partner of P3 Propane Safety and P3 Duty to Warn. P3 offers a digital documentation program to enhance the accuracy and completeness of propane safety forms, helping marketers reduce risk, save money, and increase efficiency. P3 Duty to Warn is an annual risk mitigation process for propane dealers to inform customers of important propane safety information.

Stephen Kaminski, NPGA President and CEO, said "P3 Propane Safety has truly become the industry standard for safety documentation and compliance. They have helped hundreds of propane companies across the country save money, improve efficiency, and enhance their compliance with regulatory requirements."

In addition, the P3 Compliance System provides users with all the elements needed to implement or upgrade their propane safety documentation including inspection forms, guidance (training) documents to facilitate consistency, an intuitive dashboard for multi-location marketers, bulk plant inspections and reporting, and ongoing review of inspection data by in-house propane safety professionals, which can be done remotely through the cloud-based system.

Brent Cammett, Director of Safety and Training Services at P3, said, "The P3 Compliance System solves two of the biggest challenges that marketers face when striving for accurate and complete safety inspection records for each customer. First, having the capacity to review thousands of field inspections is a daunting, if not impossible, task. The system's Error Recognition Technology does this automatically, making the task fast and efficient. Secondly, this process provides for significant improvements in training. We can identify errors by individual technicians and then customize training on a client-by-client basis, rather than a one-size-fits-all approach."

P3's Duty to Warn Program has also been endorsed as part of the NPGA Affinity Program. Jerry Schimmel, Vice President of Sales at P3, said, "What marketers like best about our process is that it is comprehensive, cost effective, and efficient. We provide customized informative letters, the PERC safety brochure, and a third-party certificate of completion for marketer records. As a result of our efficient turn-key process, we have developed into the number one Duty to Warn service in the industry, mailing to more than 2.9 million customers in 2024."
